your business.  
Good for nature.

## Since 1970

The Copobras Group has 12 units - 9 units of the Copobras brand, leader in the disposable market in the country - strategically positioned in the Brazilian territory, equipped with the most advanced technologies for the development of disposables, we serve our customers with efficiency and innovation.

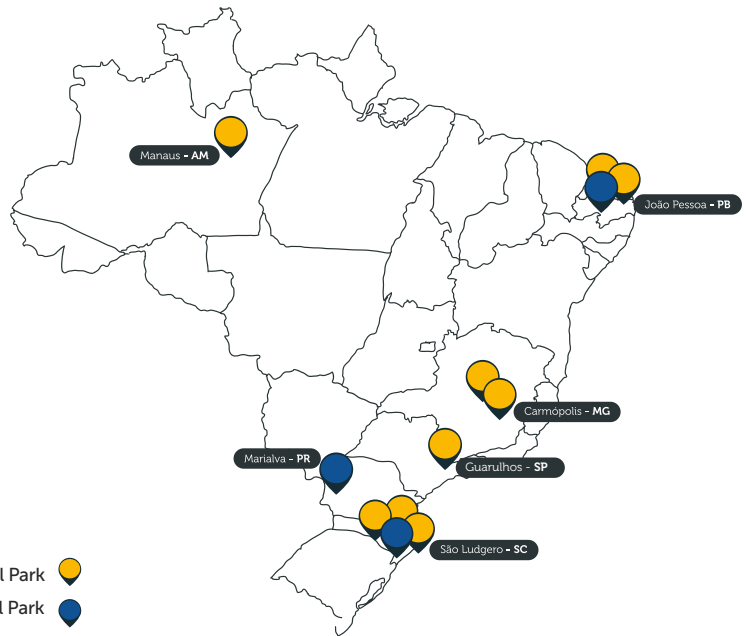

This is the result of serious work, built on solid foundations, a strong market philosophy and values that reflect the quality and dedication with which we manufacture products.

**The largest disposable company in the country, the most remembered in the PPR award and the favorite among supermarkets affiliated to APAS**

# Factories throughout Brazil.

Agents throughout the national territory.

## OUR PILLARS

### TRUST

In more than 5 decades in the market, we have cultivated a great commercial relationship, which inspires long-term partnerships with each of our customers.

### QUALITY

Our products are made with great care and dedication, formulated with 100% virgin raw material. Recognized quality, a reflection of work done with seriousness and respect for consumers.

### STRUCTURE

We have 12 production units in 6 industrial plants located in the states of Santa Catarina, Paraná, São Paulo, Minas Gerais, Paraíba and Amazonas. Together, they have an installed processing capacity of 60,000 tons / year.

### DELIVERY

We use different types of modes to deliver our products carefully and quickly. Logistic partners help us to sell our products with quality, all over the country and also outside Brazil.

## SUSTAINABLE COMMITMENT

At the Copobras Group, sustainability is widely practiced and committed to the future. We promote a sustainable relationship with the communities where we operate, employees, customers, suppliers and service providers. We support reverse logistics projects in which our products are collected and transformed into new items. We comply with NBR ISO 9001: 2008, NBR ISO 14.001, being one of the only companies in Brazil certified by NBR ISO 22.000, a food safety standard that guarantees origin and hygiene in packaging that are in contact with food.

# Highlight at your point of sale

Greater highlight in the POS

Modern design Differentiated from the competition

**• Featured Brand**  
Focus on the Copobras brand to facilitate identification.

**• Bar Code**  
Highlighted bar code to facilitate when passing the product at the checkout.

**• Most Visible Product**  
Larger area with transparency and arguments that assist in the sale.

**• Mark and mL on the bottom of the package**  
Facilitates product identification in wholesalers and cashiers.

**• More organized information**  
Larger, more visible texts and information in Spanish.

# POS Guidance Manual

This manual was created to guide you. So you have the information needed to build an even more efficient POS.

## Why is it important to organize the POS?

Increase product turnover

Improve visibility on the gondola

Make buying easy

Decrease breakage

Position the product so that it is at the average consumer height

The actions of marketing and investment in innovation are only efficient if we have a quality POS. So make sure that your customers' sales points are well designed.

The location of the mix on the gondolas is a competitive differential, as it gives greater visibility to the exposed item, increasing sales on impulse.

Doubts or suggestions, please contact commercial and marketing. Enjoy and send us pictures of before and after the organized gondola.

### 01

In the category of disposable cups, plates and pots, Copobras must always be the first brand.

### 03

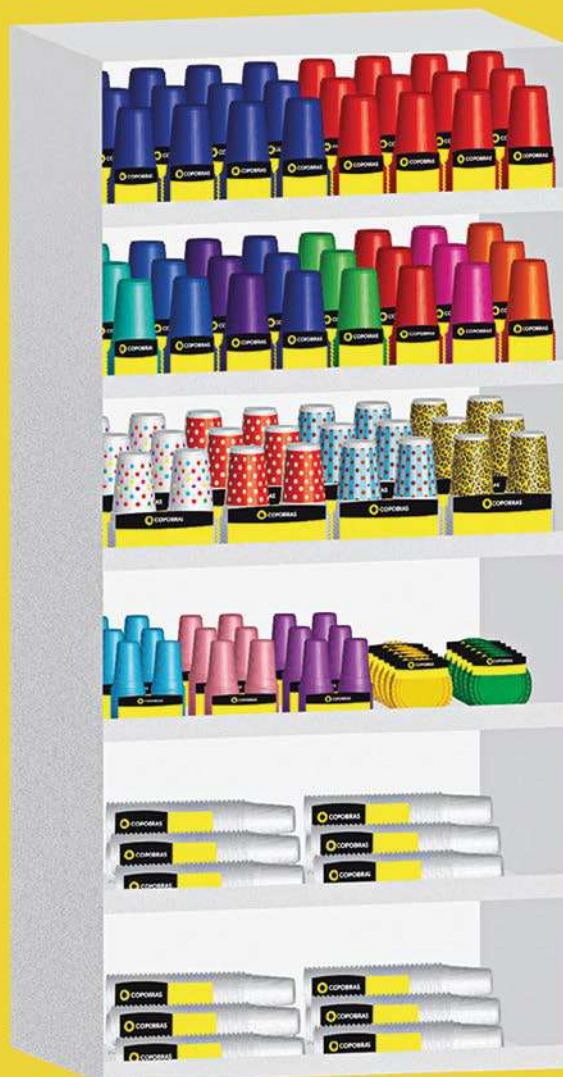

Keep all Copobras products in a single block within each category and with the main face of the packaging facing forward.

### 05

Cups and plates of the party line (colored) should be close, facilitating the purchase.

### 07

Try to expose the dishes "standing", with the printed side facing the customer.

### 02

Copobras products must have more space on the shelves than competitors;

### 04

Take care that Copobras products are not behind Cross, Clips Trip or other types of materials that hinder visibility.

### 06

In supermarkets, the products that must be at eye level, or at the tip of the gondola, are those with the highest added value (Balada cup, American Party, Decorated Party).

### 08

Leave more space for products that sell more (basic glasses), but prioritize the exposure of those with higher added value and that value the brand.

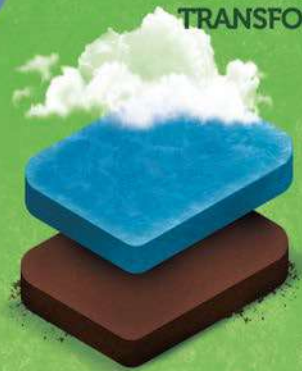

# Bio degra dables

# Biodegradable COPOBRAS

Copobras constantly invests in innovation, without forgetting its responsibility to the environment. This philosophy guided the development of biodegradable products, meeting the needs of the new form of consumption.

Bio plates and cups have a differentiated and exclusive design to communicate the concept of sustainability. They also bring information that is biodegradable in Braille, promoting the inclusion of the visually impaired in the construction of a sustainable world.

## Can it be recycled?

Biodegradable products can and should be recycled, being disposed of with other plastic waste.

## How does it work?

Biodegradable products follow the Copobras quality standard that you already know, maintaining their mechanical functionality. However, they now have the power of the Go Green P-Life biodegradable additive. Thus, the products become fully biodegradable, surprisingly reducing the biodegradation time, which starts when the product is discarded in the environment and comes into contact with the ideal conditions of the activating agents (UV light, heat, moisture and oxygen). Go Green P-Life is the first and only biodegradant in the world that meets the ASTM-D6954-4 standard in its entirety, with an international certificate.

Cup and plate packaging are also biodegradable.

## Much cheaper.

Regarding biodegradable paper products, cassava starch, corn starch and sugarcane bagasse.

**Copobras biodegradable line is a sustainable and affordable option.**

PREMIUM BIO TRAYS  
 NO. 020 RETORNO TRAYS  
 PLANN'S BIO  
 BIO DISCS  
 BIO ABSORBENT TRAYS

## Absorbent and Biodegradable

Exclusive product for cams, in fresh or frozen cuts. The liquid is retained inside the tray maintaining the stability of the weight.

- Reduces the need for repackaging;
- Avoids dirty shelves and stench due to accumulated juice;
- The entire tray is absorbent, so it also prevents the leakage of liquids from the sides;
- It avoids accidents such as: getting your hand or clothes dirty when handling, nor does it dirty the vehicle that will transport it;
- Prevents other products placed in the cart or in the same bag as the meat tray, from getting dirty and wet.

Our absorbent trays are the only biodegradable ones in the Brazilian market. They are produced with the approved and audited P-Life technology, a fatty acid-based resin (derived from Palm coconut oil), rare earths and lubricants, which transforms EPS into carbon dioxide, water, minerals and organic matter, with the absence of toxic residues in its decomposition. P-Life was analyzed according to ASTM 6954-4 - SPCR141. These trays must be recycled, but if disposed of incorrectly in the environment, their useful life is reduced to just 16 years.

# PP/PS Line

The largest mix of products on the market,  
designed to facilitate people's daily lives.

Innovation, quality and practicality.

# PARTY CUP AMERICAN STYLE

★★★★★

**It is successful among young people and combines with all parties:**

# Fast Food Cups

This is the most used line in Bars, Snack Bars and Fast Food Restaurants, in addition to also being the favorite glass of the Breweries, due to the great transparency and high resistance. They are compatible with lids, whether with or without holes, they can also be customized with the customer's logo (except CFT-400 / CFT-500).

Check out the models available in the biodegradable version on page 8.

**SUGGESTED USE:**

Soda, juice, draft beer, beer, milkshake, free vat, whiskey, vitamins and popcorn (CFT-770).  
Ideal and automatic coffee machines.

**EASY INSTALLATION**  
and replacement of cups

# EPS Line

Quality and  
added value to  
your product.

## Reverse logistics project

Copobras supports several reverse logistics projects, which collect the products already used to transform them into new products.

To learn more about these projects, talk to our commercial department.

**100%**  
RECYCLABLE

# Good for your business. Good for nature.

Consumers are more concerned with environmental issues and their consequences. These concerns are reflected in the form of consumption and relationship with the brands.

And you can bring a differentiator to your business. Copobras lunchboxes, hamburgers, trays and egg holders can be biodegradable.

**Consult our commercial department  
about the minimum production batch.**

**Bio  
degra  
dables**  
COPOBRAS

# Gourmet Line

Premium products for the Gourmet market.

Sophistication of black color values Gourmet food.

Possibility of customization, which adds value to the product and enhances the brand.

(minimum batch of 100 boxes per layout)

Brands are valued when associated with Premium products.

Resistant to hot and cold temperature

- Adds value to the product
- Retains temperature (cold and hot)
- Avoids the customer's thermal discomfort
- Great cost-benefit ratio

CUPS AND CONTAINERS CAN BE CUSTOMIZED

# Trays

## Colors that organize and highlight your products

Indication of use of colors in the trays line:

### Black

Special cuts of cattle.  
Values the best cuts.

### Blue

Fish and crustaceans.

### Yellow

Chicken (all cuts).

### Pink

Pig and goat cuts.

### Green

Horticulture.

### White

Bread making, beef cuts,  
sausage and sliced cold cuts.

## PREMIUM

Reinforced trays, with a wide variety of sizes and colors.

**SUGGESTED USE:**  
Sliced cold cuts, cheeses and hams.

# Trays

**SUGGESTED USE:**

Trays with great resistance and versatility. They adapt to the most varied uses. Ideal for butchers and fishmongers, in the storage and packaging of crustaceans, cuts with medium-sized bone, fillets and needle tips.

They can also be used in fresh produce, sliced and chilled fruits in natura, or for heavy vegetables such as chayote and potatoes.

# Cash & Carry

We research, modernize and go to great lengths to simplify your life. We launched the fractional line of EPS products especially for your business!

Perfect for your business!

\*Fractional packaging presentation simulation

Reduction of space in gondola and storage.

Ideal for fast food microentrepreneurs.

Smaller packaging that reduces risk of contamination and product waste.

# Chicken Box

New concept in packaging for roast chicken with quality and innovation Copobras

In black or white.

## Hermetic closure

It guarantees food safety and prevents possible leaks.

## Embossed internal base

That suspends the chicken avoiding direct contact with the fat.

## High mechanical strength

Due to product design

## Separate base and lid

Provide differentiated applications

## Patent Required

## The lid can be customized

(minimum batch of 100 boxes per layout)

PP - White Polypropylene    PPT - Transparent Polypropylene

## Unprinted Lids

PP Lids in various sizes, colors and excellent sealing. The colored lids help to identify and differentiate the flavors of the products, and can be a complement to the printed container.

### DIFFERENTIAL:

Lid with square cutout, for perfect fit with the bottom of the container (PPT-325FQ). Bringing a differential in the positioning of the gondola.

TPT-502FQ

Product	Color	Code	Unit Weight (g)	Compatible Container	Compatible with sealed containers	Diameter (mm)	Box Weight (kg)	Quantity per box
